## GLOBAL MIND COACHING PHILOSOPHY

A Coach is NOT a Mentor, Counsellor, Teacher, Trainer, Adviser, or Consultant.

A coach is responsible to:

- Discover, clarify, and align the potential with what the client deserves to achieve
- Encourage client self-discovery and self-empowerment.
- Elicit client-generated solutions and strategies.
- Hold the client responsible and accountable for their decisions.

Becoming an effective Coach isn't through just a course; it's your life – all of your life experiences that have given you the ability to **Reflect**, **Develop insight** and **Give perspective!**

- People are the experts in their own life and work.
- People are resourceful and able to set Goals and achieve them.

- So, you don't want to have a massive investment of many months to become a Coach.
- What you need is to have a masterful coach training program that will complement, enhance and further develop the skills and experiences you possess now.
- **The Global Mind Coach Training Program** is designed in such a way to meet this requirement.
